

Institutional Communication Architectures and Digital Sender Identities: An Exhaustive Analysis of Tier 1, Tier 2, and Tier 3 Higher Education Institutions in Gujarat

Introduction to the Strategic Importance of Institutional Digital Sender Identities

The higher education landscape in the Indian state of Gujarat is undergoing a profound digital transformation, characterized by a complex, multi-tiered network of institutions that range from highly centralized, heavily funded private universities to deeply entrenched legacy state universities and localized government engineering colleges. As institutional outreach, academic networking, student acquisition, and digital recruitment become increasingly sophisticated and competitive, understanding the digital sender identities of these organizations has become an operational necessity. An institution's digital nomenclature—specifically the email domain architectures, administrative routing protocols, and faculty communication standards—is rarely arbitrary. Instead, it serves as a highly accurate mirror reflecting the institution's organizational hierarchy, its historical evolution, and its operational philosophy regarding centralized versus decentralized IT governance.

For institutional senders, educational technology vendors, corporate recruiters, and academic collaborators attempting to penetrate these networks, the ability to decode these domain structures dictates the success or failure of their outreach. A domain is not merely a contact point; it is a gateway controlled by specific enterprise resource planning (ERP) systems, customer relationship management (CRM) tools, and state-mandated bureaucratic firewalls. This report provides an exhaustive, granular analysis of the digital communication frameworks across Tier 1, Tier 2, and Tier 3 institutions in Gujarat. The core objective is to map the domain architectures utilized by administrative personnel and faculty members, decode the underlying syntax of their contact details, and cross-verify these domains across various constituent colleges and academic branches.

By systematically analyzing these digital structures, significant second and third-order insights emerge. These insights reveal how these institutions manage their internal operations, how they interact with overarching state bureaucratic frameworks such as the Directorate of Technical Education (DTE), and how they deploy Role-Based Access Control (RBAC) to ensure institutional memory and continuity. The analysis begins with an in-depth dissection of highly

structured private ecosystems, specifically the Charotar University of Science and Technology (CHARUSAT) and the Charutar Vidya Mandal University (CVMU) consortium. It subsequently expands to encompass legacy state engineering colleges, massively scaling private universities such as Parul, Marwadi, and Ganpat University, and finally, the sprawling, often fragmented digital footprints of legacy state affiliating universities.

Typology of the Higher Education Ecosystem in Gujarat

Before dissecting the specific routing protocols of individual institutions, it is critical to establish the tiered framework that defines the academic ecosystem in Gujarat. The state operates a diverse portfolio of institutions, each with distinct funding mechanisms, regulatory oversight, and consequent IT infrastructure capabilities. The digital identity of an institution is inextricably linked to its tier and operational model.

The apex of this hierarchy comprises Tier 1 institutions, which are globally recognized and highly autonomous. These include elite national benchmarks of academic excellence operating under central government or heavy private endowments, such as the Indian Institute of Technology (IIT) Gandhinagar, the Sardar Vallabhbhai National Institute of Technology (SVNIT) in Surat, and premier private entities like the Dhirubhai Ambani Institute of Information and Communication Technology (DA-IICT) and Nirma University.¹ These institutions utilize enterprise-grade, flawlessly integrated IT infrastructures with strict naming conventions.

Tier 2 institutions represent high-value private specialists, autonomous state universities, and legacy engineering colleges with massive regional influence. Institutions such as Pandit Deendayal Energy University (PDEU), Ahmedabad University, Dharmsinh Desai University (DDU), and L. D. College of Engineering (LDCE) occupy this space.¹ Their digital architectures are robust but often reflect complex departmental compartmentalization necessary to manage diverse academic faculties.

Tier 3 institutions encompass a vast array of newly established self-financed institutes (SFIs), localized Government Engineering Colleges (GECs) spread across regional districts, and affiliated colleges operating under the umbrella of massive state universities like Gujarat University (GU) and Sardar Patel University (SPU).⁶ The IT infrastructure in this tier is highly variable. While newer private institutions deploy modern, cloud-based CRM domains, legacy affiliated colleges often suffer from chronic IT underfunding, resulting in a reliance on unsecured commercial email servers, which poses severe challenges for automated institutional outreach.

The CHARUSAT Ecosystem: A Paradigm of Centralized Matrix Governance

The Charotar University of Science and Technology (CHARUSAT), situated in the educational hub of Changa, represents a paradigmatic example of a highly centralized, Tier 1/Tier 2 private university infrastructure.¹⁰ CHARUSAT operates a vast and multidisciplinary array of constituent institutes spanning engineering, computer applications, pharmacy, management, applied sciences, nursing, and physiotherapy.¹² Despite the immense diversity of academic disciplines housed within these disparate institutes, CHARUSAT's digital communication architecture is rigorously standardized under a single, unified Top-Level Domain (TLD): @charusat.ac.in.¹⁰

Constituent College Mapping and Departmental Routing Syntax

A detailed forensic review of CHARUSAT's administrative and admission routing reveals a highly sophisticated matrix structure. The university utilizes a prefix-based routing system appended to the primary domain, allowing all external inquiries to be filtered centrally while simultaneously being directed to specific institutional nodes. This approach implies the presence of a robust backend Customer Relationship Management (CRM) or enterprise routing system designed to prevent admission bottlenecks and ensure rapid query resolution.

The admissions and administrative contact points follow a strict syntactical rule, generally formatted as admission_[institute_acronym]@[domain] or, for highly segmented institutes like engineering, admission_[institute_acronym]_[branch_acronym]@[domain].¹⁰ To validate the integrity of this routing system, cross-verification with individual faculty members across these constituent colleges confirms that the @charusat.ac.in domain is universally enforced.

Constituent Institute	Academic Focus / Branch	Admission Query Email Routing	Faculty / Admin Contact Name	Faculty Contact Verification Identity
Chandaben Mohanbhai Patel Institute of Computer Application (CMPICA)	BCA, MCA, B.Sc (IT), M.Sc (IT)	admission_cm pica@charusat .ac.in	Dr. Jaimin N Undavia	Assistant Professor, CMPICA ¹⁰
Chandubhai S. Patel Institute Of Technology (CSPIT)	Computer Engineering (CE)	admission_cs p i t_ce@charusat .ac.in	Mrs. Mayuri Popat	Assistant Professor, CSPIT ¹⁰
Chandubhai S.	Information	admission_cs p i	Ms. Dhaval	Assistant

Patel Institute Of Technology (CSPIT)	Technology (IT)	t_it@charusat.ac.in	Patel	Professor, CSPIT ¹⁰
Chandubhai S. Patel Institute Of Technology (CSPIT)	Electronics & Communication (EC)	admission_cspit_ec@charusat.ac.in	Ms. Poonam Thanki	Assistant Professor, CSPIT ¹⁰
Chandubhai S. Patel Institute Of Technology (CSPIT)	Civil Engineering (CL)	admission_cspit_cl@charusat.ac.in	Mr. Ankit Wankawala	Assistant Professor, CSPIT ¹⁰
Chandubhai S. Patel Institute Of Technology (CSPIT)	Mechanical Engineering (ME)	admission_cspit_me@charusat.ac.in	Mr. Sagar Chokshi	Assistant Professor, CSPIT ¹⁰
Chandubhai S. Patel Institute Of Technology (CSPIT)	Electrical Engineering (EE)	admission_cspit_ee@charusat.ac.in	Mr. Pratik Mochi	Assistant Professor, CSPIT ¹⁰
Devang Patel Institute of Advance Technology and Research (DEPSTAR)	CSE, IT, CE	admission_depstar@charusat.ac.in	Mr. Hardik Jayswal	Assistant Professor, DEPSTAR ¹⁰
Ramanbhai Patel College of Pharmacy (RPCP)	B.Pharm, M.Pharm	admission_rpcp@charusat.ac.in	Dr. Ashish Patel	Assistant Professor, RPCP ¹⁰
Indukaka Ipcowala Institute of Management	BBA, MBA, PGDM	admission_i2im@charusat.ac.in	Dr. Pramod Patel	Librarian, I2IM ¹⁰

(I2IM)				
P. D. Patel Institute of Applied Sciences (PDPIAS)	B.Sc, M.Sc	admission_pdp ias@charusat.a c.in	Mr. Rakesh Dave	Assistant Registrar, PDPIAS ¹⁰
Manikaka Topawala Institute of Nursing (MTIN)	GNM, B.Sc (Nursing)	admission_mti n@charusat.ac .in	Mr. Jamin Chauhan	Assistant Professor, MTIN ¹⁰
Bapubhai Desaibhai Patel Institute of Paramedical Sciences (BDIAS/CIPS)	Paramedical Sciences	admission_cips @charusat.ac.i n	Mr. Yogesh Chauhan	Assistant Professor, CIPS ¹⁰

The implication of this structured routing is profound for institutional senders. Outreach campaigns targeting computer science departments, for instance, cannot simply rely on a generic university inbox. They must specifically target the cspit_ce, cspit_it, or depstar routing vectors to ensure their communications reach the relevant departmental decision-makers.

Role-Based Access Control (RBAC) in Leadership Communication

Further analysis of CHARUSAT's upper-echelon leadership hierarchy reveals a deliberate and heavy reliance on Role-Based Access Control (RBAC) email architectures. Rather than tying principal, dean, or director communications to the personal names of the current officeholders (which would necessitate a change in contact databases every time an academic transition occurs), the university utilizes permanent, position-based aliases.¹¹ This is a strategic mechanism designed to ensure institutional memory and continuity. When a dean or principal transitions out of their role, the email address, along with its extensive historical correspondence and institutional permissions, remains securely with the office rather than departing with the individual.

The syntax for university officers at CHARUSAT relies on dot-separated role and domain identifiers, rigidly formatted as [role].[institute_acronym]@charusat.ac.in or [role].[faculty_acronym]@charusat.ac.in.¹¹

Administrative Role	Current Officeholder	Official Institutional Email	Academic Domain Focus
Principal, CSPIT	Dr. Trushit Upadhyaya	principal.cspit@charusat.ac.in	Technology & Engineering ¹¹
Principal, DEPSTAR	Dr. Bankim Patel	principal.depstar@charusat.ac.in	Advanced Technology ¹¹
Principal, I2IM	Dr. Reshma Sable	principal.iiim@charusat.ac.in	Management Studies ¹¹
Principal, RPCP	Dr. Manan Raval	principal.rpcp@charusat.ac.in	Pharmacy ¹¹
Principal, PDPIAS	Dr. Abhishek Dadhania	principal.pdpias@charusat.ac.in	Applied Sciences ¹¹
Principal, CMPICA	Dr. Dharmendra Patel	principal.cmpica@charusat.ac.in	Computer Applications ¹¹
Principal, MTIN	Dr. Anil Sharma	principal.mtin@charusat.ac.in	Nursing ¹¹
Principal, ARIP	Dr. Dhruv Dave	principal.arip@charusat.ac.in	Physiotherapy ¹¹
Principal, BDIAS	Dr. Dhara Patel	principal.cips@charusat.ac.in	Allied and Healthcare ¹¹
Dean, Faculty of Sciences	Dr. Gayatri Dave	dean.fas@charusat.ac.in	Sciences ¹¹
Dean, Faculty of Pharmacy	Dr. Samir Patel	dean.fph@charusat.ac.in	Pharmacy ¹¹
Dean, Computer Science	Dr. Sanskruti Patel	dean.fca@charusat.ac.in	Computer Science & Applications ¹¹

Dean, Humanities	Dr. Bhaskar Pandya	dean.foh@charusat.ac.in	Humanities ¹¹
Dean, Research	Dr. Shailesh Khant	dean.research@charusat.ac.in	CHARUSAT Research ¹¹
Dean, Management	Dr. Rajesh Sadhwani	dean.fms@charusat.ac.in	Management Studies ¹¹

The second-order insight drawn from the CHARUSAT data is that the institution operates an extraordinarily tight and uncompromising IT governance model. Any strategic outreach targeted at this institution must respect these functional aliases. Reaching out to a faculty member via a role-based email guarantees that the message enters the official administrative workflow, is likely logged by the university's central servers, and is accessible to administrative assistants. Conversely, direct outreach to individual professors, while possible, may bypass the CRM systems specifically designed to handle institutional partnerships, vendor agreements, or mass admission queries.

The CVMU Consortium: Navigating Post-Merger Digital Integration Friction

The Charutar Vidya Mandal University (CVMU), located in the historic educational township of Vallabh Vidyanagar, presents a deeply contrasting digital architecture to the unified model of CHARUSAT. CVMU is not a university built from the ground up; rather, it is a massive, historically significant educational trust that has recently evolved into a private university structure.¹³ It acts as an umbrella organization for over two dozen constituent colleges, many of which are highly prestigious legacy institutions that operated with complete autonomy for decades prior to the formation of the unified university entity.¹⁴

This historical context is an absolutely crucial variable for understanding CVMU's currently fragmented email architecture. When a newly formed university entity absorbs legacy institutions—institutions that already possess immense brand equity, global alumni networks, and deeply established IT infrastructures—there is profound, almost inevitable friction in migrating to a unified digital identity. The data extracted indicates that CVMU is currently navigating a protracted transitional phase. This has resulted in a complex hybrid ecosystem where the centralized, newly minted @cvmu.edu.in domain operates in parallel with deeply entrenched local college domains such as @gcet.ac.in, @adit.ac.in, and @bvmengineering.ac.in.¹⁵

The Centralized Vanguard: Institutes Fully Integrated into the CVMU Domain

Several constituent bodies within the CVMU framework, primarily those heavily focused on theoretical sciences, research, and newer academic disciplines, have successfully completed their IT migration and fully adopted the parent university's domain schema.¹⁸ In these environments, faculty and administrative personnel exclusively utilize the @cvmu.edu.in TLD, signaling a high degree of integration with the central trust.

The Institute of Science & Technology for Advanced Studies & Research (ISTAR) demonstrates a complete and flawless migration to the CVMU framework.¹⁸ Faculty emails within ISTAR adhere strictly to a firstname.lastname@cvmu.edu.in format, which is standard practice for modern enterprise deployments utilizing Active Directory or Google Workspace. For example, Dr. Ashish Joshi, serving as the Head of the Computer Science Department, utilizes ashish.joshi@cvmu.edu.in.¹⁸ Within the Industrial Chemistry department, this syntax is replicated perfectly, with Dr. Jeimin R. Joshi utilizing jeimin.joshi@cvmu.edu.in, Mr. Khodidas K. Bhanderi utilizing khodidas.bhanderi@cvmu.edu.in, and Dr. Vidhi Patel utilizing vidhi.patel@cvmu.edu.in.²¹ Furthermore, administrative RBAC emails for ISTAR are standardized to the parent domain: office.istar@cvmu.edu.in serves as the central hub, while the principal's office, managed by Dr. Mahendrasinh Raj, utilizes principal.istar@cvmu.edu.in.²⁰ The program advisor, Dr. Sarvesh Trivedi, is accessible via srtrivedi@cvmu.edu.in.²²

Similarly, the S G M English Medium College of Commerce and Management (SEMCOM) presents a fascinating case study in domain migration. SEMCOM historically maintained its own independent domain (@semcom.ac.in), a fact evidenced by legacy academic publications that continue to direct manuscript submissions to addresses like smtr@semcom.ac.in.¹⁹ However, contemporary data indicates a definitive, enforced shift to the CVMU domain. The principal's office now exclusively utilizes principal.semcom@cvmu.edu.in, student support queries are routed to studentsupport.semcom@cvmu.edu.in, and crucial admission inquiries and placements are handled by faculty members such as Dr. Renil Thomas at renil.thomas@cvmu.edu.in.²⁴ Accommodation logistics follow suit, with hostel wardens utilizing chetanbhai.patel@cvmu.edu.in and khyati.patel@cvmu.edu.in.²⁴

Research faculty across the bio-science and applied science institutes, specifically the Ashok & Rita Patel Institute of Biosciences (ARIBAS) and the Natubhai V. Patel College of Pure and Applied Sciences (NVPAS), have also wholly adopted the central domain.²⁵ Emails consistently map to the standardized syntax, ensuring researchers are easily identifiable.

Constituent College	Faculty Member	Department / Specialization	Official Email Identity
ARIBAS	Dr. Mukund Thakur	Marine Biology, Bioinformatics	mukund.thakur@cvmu.edu.in ²⁵

ARIBAS	Dr. Shilpa Gupte	Probiotics, Antimicrobial peptides	shilpa.gupte@cvmu .edu.in ²⁵
ARIBAS	Dr. Sunil M Khristi	Phytochemicals, Biodiesel	sunil.khristi@cvmu. edu.in ²⁵
ARIBAS	Dr. Nisha Daxini	Bioremediation, Secondary metabolites	nisha.daxini@cvmu. edu.in ²⁵
NVPAS	Dr. Akshaya Gupte	Enzymology, Fermentation technology	akshaya.gupte@cv mu.edu.in ²⁵
NVPAS	Dr. Yachana Jha	Plant stress physiology, Biotechnology	yachana.jha@cvmu. edu.in ²⁵
NVPAS	Dr. Susmita Sahoo	Natural Sciences	susmita.sahoo@cv mu.edu.in ²⁵

The adoption of the @cvmu.edu.in domain by these specific colleges suggests that CVMU prioritized the integration of research-heavy and science-focused institutes early in its university-building phase, ensuring that grant applications, scientific publications, and international academic networking occur under a unified university banner. This is corroborated by the fact that professors like Shveta Joshi transitioned from legacy domains (@vpscience.org) to the modern @cvmu.edu.in identity.²⁷

The Legacy Holdouts: Autonomous Digital Identities within the CVMU Framework

The most significant and operationally critical insight regarding institutional senders within the CVMU ecosystem is the stubborn persistence of localized domains among the premier, legacy engineering colleges. These Tier 2 institutions possess massive operational scale, immense regional prestige, and deeply engaged alumni networks. Consequently, they necessitate the retention of their original TLDs, resisting total absorption into the parent domain.

G H Patel College of Engineering & Technology (GCET)

GCET, a highly regarded engineering institution within the trust, maintains absolute and uncompromising reliance on the @gcet.ac.in domain.¹⁶ The naming convention utilized for

faculty is highly distinct and somewhat antiquated: it entirely eschews the standard dot-separator used in modern cloud deployments in favor of a concatenated firstnamelastname@gcet.ac.in syntax.¹⁶ This syntactical choice strongly implies a legacy, locally hosted exchange server that has been maintained for years rather than migrating to a modern, standardized cloud suite.

Administrative routing relies heavily on RBAC, with the principal utilizing principal@gcet.ac.in.¹⁶ The faculty syntax is uniformly concatenated across all engineering branches. Dr. Vinod Patel, Head of Mechatronics, utilizes vinodpatel@gcet.ac.in.¹⁶ Dr. Nikhil Gondaliya, Head of Information Technology, uses nikhilgondaliya@gcet.ac.in.¹⁶ In the Civil Engineering department, Dr. Khadeeja Priyan uses khadeejapriyan@gcet.ac.in, while in Computer Engineering, Dr. Sudhir Vegad uses sudhirvegad@gcet.ac.in and Dr. Kinjal Joshi uses kinjaljoshi@gcet.ac.in.¹⁶ Even non-teaching operational staff, such as Mr. Alpesh Shukla, utilize this strict format (alpeshshukla@gcet.ac.in).²⁸ This internal domain enforcement extends even to professional chapters and external affiliations; the IEEE Branch Counsellor, Rakesh Patel, operates exclusively via rakeshpatel@gcet.ac.in rather than a generic IEEE domain.²⁹

A D Patel Institute of Technology (ADIT)

Operating with a similar degree of digital autonomy, ADIT heavily enforces its localized domain, @adit.ac.in.¹⁷ However, unlike GCET's rigid concatenation, ADIT's organizational routing is significantly more departmentally segmented, allowing for finer control over incoming communications. General inquiries are funneled into info@adit.ac.in and office@adit.ac.in, ensuring that basic traffic does not overwhelm academic staff.¹⁷ Admissions queries are routed through admission@adit.ac.in or the pluralized admissions@adit.ac.in, while overarching academic affairs are directed to academic@adit.ac.in.¹⁷

Leadership and faculty communication at ADIT presents an interesting dichotomy. The principal, Dr. Vishal Singh, utilizes the standard RBAC principal@adit.ac.in.¹⁷ Faculty email structures appear slightly more variable. For instance, Abhay Dasadia uses abhaydasadia@adit.ac.in, mirroring the GCET style.³¹ However, an administrative contact, Dr. Nimit Patel, was found utilizing a commercial fallback domain (patel_nimit22@yahoo.com).¹⁷ This anomaly highlights occasional, localized gaps in strict domain enforcement, suggesting that while the .ac.in infrastructure exists, some staff members default to personal commercial accounts for convenience or due to legacy IT habits.

Birla Vishvakarma Mahavidyalaya (BVM)

As the oldest and arguably the most prestigious legacy engineering college in Gujarat, BVM functions with an exceptionally high degree of autonomy within the CVMU umbrella.³² Its digital footprint is deeply anchored to @bvmengineering.ac.in, a domain that carries significant weight in regional engineering circles.¹⁵ The digital infrastructure here is highly functional and cleanly segregated. The Principal's office utilizes principal@bvmengineering.ac.in.³³

Recognizing the importance of corporate relations, the placement cell operates a dedicated routing vector at placement@bvmengineering.ac.in.³³ Furthermore, the historically robust Alumni Association utilizes bvmaa@bvmengineering.ac.in, ensuring that alumni outreach and fundraising operate independently from core academic servers.¹⁵

B. J. Vanijya Mahavidyalaya (BJVM): The Vulnerability of Commercial Domains

The digital identity of BJVM, a prominent commerce college operating under the Charutar Vidya Mandal framework, reveals the severe vulnerabilities inherent in legacy Tier 3 institutions that lack stringent, centralized IT governance.³⁴ While the institution nominally possesses an official academic domain (@bjvm.ac.in), its actual, real-world usage is alarmingly inconsistent and frequently bypassed entirely.

The principal utilizes the official RBAC address, principal@bjvm.ac.in.³⁷ However, the registered email for primary institutional communication, external inquiries, and even critical National Assessment and Accreditation Council (NAAC) documentation relies heavily on unsecured commercial Yahoo and Gmail servers. Across multiple official documents, the primary institutional contact is consistently listed as bjvm_vvnagar@yahoo.com.³⁴ Furthermore, the Internal Quality Assurance Cell (IQAC)—a critical administrative body responsible for academic compliance—is coordinated by Dr. John Parmar, who utilizes bjvm51iqac@gmail.com and johnbjvm94@gmail.com for official university business.³⁵

This systemic reliance on @yahoo.com and @gmail.com for official, highly sensitive university operations indicates a massive infrastructure vulnerability. It suggests an asynchronous routing framework where secure, cloud-based institutional infrastructure has either not been fully funded, properly deployed, or widely adopted, forcing administrative staff to rely on personal or ad-hoc commercial accounts. For institutional senders targeting BJVM, this presents a unique paradox: bypassing the official .ac.in domain in favor of these commercial aliases may actually yield higher open rates and faster responses, a phenomenon utterly unique to under-resourced legacy environments.

State-Run Engineering and Technical Institutions: The Dual-Routing Paradigm

The network of Government Engineering Colleges (GECs) in Gujarat forms the absolute backbone of the state's public technical education ecosystem. These institutions, strictly regulated and generally categorized as Tier 2 or Tier 3 public colleges depending on their age and location, exhibit a fascinating and highly specific "dual-routing" paradigm in their digital communication architectures.⁴

Because these colleges are wholly owned, funded, and governed by the state's Directorate of Technical Education (DTE), their communication structures are fundamentally bifurcated. One highly rigid channel exists exclusively for state bureaucratic compliance, funding requests, and

high-level administrative reporting, while a separate, localized channel exists for daily academic operations, student engagement, and faculty research.

Bureaucratic Routing: The @gujarat.gov.in Mandate

For official state business, institutional leadership, and DTE-level coordination, the government imposes a standardized, non-negotiable Top-Level Domain across all GECs: @gujarat.gov.in.³⁹ The syntax for these primary communication nodes is universally rigid, taking the exact format of gec-[location_identifier]-dte@gujarat.gov.in.³⁹ This architecture ensures that the state's centralized IT apparatus can secure, seamlessly archive, and constantly monitor all primary leadership communications to prevent data leaks and ensure compliance.

Government Engineering College	Regional District	Official DTE Compliance Routing Identity
DR. S. & S.S. Ghandhy Government Engineering College	Surat	gec-surat-dte@gujarat.gov.in ³⁹
Government Engineering College, Bharuch	Bharuch	gec-bharuch-dte@gujarat.gov.in ³⁹
Government Engineering College, Bhavnagar	Bhavnagar	gec-bhav-dte@gujarat.gov.in ³⁹
Government Engineering College, Bhuj	Kutch	gec-bhuj-dte@gujarat.gov.in ³⁹
Government Engineering College, Dahod	Dahod	gec-dahod-dte@gujarat.gov.in ³⁹
Government Engineering College, Gandhinagar	Gandhinagar	gec-gnagar-dte@gujarat.gov.in ³⁹
Government Engineering College, Rajkot	Rajkot	gec-rajkot-dte@gujarat.gov.in ⁴¹
Government Engineering College, Modasa	Aravalli	gec-modasa-dte@gujarat.gov.in ⁴³

Academic Routing: The Autonomy of Localized Institutional Domains

Operating in parallel to the secured state network, each GEC maintains its own autonomous domain (utilizing the standard .ac.in suffix) to facilitate everyday academic affairs, faculty-to-student communication, placement operations, and localized departmental administration. Analyzing these localized domains reveals specific, idiosyncratic naming conventions adopted by the respective local IT cells of each college.

Vishwakarma Government Engineering College (VGEC), Ahmedabad

Ranked prominently among the top state colleges and located adjacent to the technological hub of Chandkheda, VGEC utilizes the @vgecg.ac.in domain.⁴⁴ The institution relies heavily on both departmental and RBAC routing to manage complex internal workflows.⁴⁴ Core administrative queries from the public route through office@vgecg.ac.in. The crucial Student Section, which handles massive volumes of admission queries, qualification verifications, and academic documentation, operates via a dedicated channel: sts@vgecg.ac.in.⁴⁵ Placements, a vital metric for the college, are centralized under Prof. Mehul Shah at tpo@vgecg.ac.in.⁴⁵

At the departmental level, VGEC utilizes functional aliases to isolate traffic. Academic departments maintain distinct routing nodes, such as hod_cse@vgecg.ac.in for the Head of Computer Science and Engineering, and hod_ei@vgecg.ac.in for Electronics & Instrumentation.⁴⁶

The identity syntax for individual faculty members at VGEC is generated using a compressed format, usually [first_initial][middle_initial][lastname]@vgecg.ac.in or [first_name][lastname]@vgecg.ac.in.⁴⁴ This creates highly identifiable communication vectors.

Department	Faculty Member	Designation	Academic Routing Identity
Computer Engineering	Prof. Kajal S. Patel	Associate Professor	kajalpatel@vgecg.ac.in ⁴⁴
Computer Engineering	Prof. Vinodray D. Thumar	Assistant Professor	vdthumar@vgecg.ac.in ⁴⁴
Computer Engineering	Prof. Rahul K. Shah	Assistant Professor	rkshah@vgecg.ac.in ⁴⁴
Civil Engineering	Prof. Navneet P.	Professor	npsingh@vgecg.ac.in ⁴⁴

	Singh		
Civil Engineering	Prof. Upendrasingh R. Singh	Assistant Professor	ursingh@vgecg.ac.in ⁴⁴
Electronics & Communication	Prof. Arun B. Nandurbarkar	Professor	abnandurbarkar@vgecg.ac.in ⁴⁴
Electronics & Communication	Prof. Manish P. Patel	Associate Professor	mppatel@vgecg.ac.in ⁴⁴

L. D. College of Engineering (LDCE), Ahmedabad

As a premier legacy institution with a massive alumni base and immense regional authority, LDCE's sprawling faculty roster operates under the highly recognizable @ldce.ac.in domain.⁴⁸ Due to its size and prestige, the institution places a strong, legally mandated emphasis on compliance and grievance redressal channels, actively promoting localized RBAC emails for these specific purposes. For instance, the Internal Complaints Committee (ICC) utilizes a highly visible icc_harassment@ldce.ac.in vector.⁴⁸

LDCE's administrative operations, rather than being entirely centralized, are distributed among various senior professors handling specific portfolios like RTI, Legal Matters, and Accounts, indicating a decentralized operational model operating behind a unified domain structure.⁴⁹ Faculty members across its vast departments (Applied Mechanics, Automobile Engineering, Biomedical Engineering) utilize standard .ac.in addresses, though the exact syntax varies by department.⁵⁰

Regional Government Engineering Colleges

The regional engineering colleges aggressively replicate the dual-routing logic established by the DTE but customize their local domains to reflect their regional identities.

GEC Rajkot utilizes the @gecrajkot.ac.in domain alongside its state-mandated DTE domain. General academic and public inquiries are funneled to info@gecrajkot.ac.in. Faculty members follow a strict [initials][lastname] format, a pattern seen with Prof. Narendrasingh B Gohil, who utilizes nbgoihl@gecrajkot.ac.in.⁴¹

GEC Dahod utilizes @gecdahod.ac.in for its internal operations. The principal uses the standard RBAC address principal@gecdahod.ac.in, ensuring operational continuity. However, faculty members here utilize an unnecessarily complex sub-domain architecture; for instance, Prof. A. R. Darji utilizes ard.amd@gecdahod.ac.in.⁴⁰ This sub-domain segmentation is rare and indicates a highly localized IT setup.

GEC Gandhinagar presents a unique case, utilizing an obfuscated domain, @gecg28.ac.in, which references its physical location in Sector 28 of the state capital, rather than its name.⁴¹ Faculty routing occurs via specific functional addresses like ssipcoordinator@gecg28.ac.in alongside standard addresses like pvpatel@gecg28.ac.in.⁴¹

The broader operational implication for institutional senders engaging with state engineering colleges is profound: outreach intended for policy changes, state funding, or top-level DTE alliances must target the @gujarat.gov.in aliases. Conversely, outreach concerning curriculum development, textbook procurement, student placements, or localized research collaboration must exclusively utilize the localized .ac.in architectures. Conflating the two will result in emails either being blocked by state firewalls or ignored by academic staff who view DTE emails as purely bureaucratic channels.

Elite Tier 1 and Scaling Private Universities: The Enterprise Architecture

The apex of Gujarat's educational ecosystem outside of the state system comprises elite autonomous institutions, deemed universities, and massively scaling private educational conglomerates. Institutions such as Nirma University, Ahmedabad University, Dharmsinh Desai University (DDU), Parul University, Marwadi University, and Ganpat University fall into this category.¹ Characterized by rigorous academic benchmarks, significant private funding, and aggressive student acquisition strategies, these institutions deploy deeply entrenched, globally standardized IT infrastructures that closely mimic corporate enterprises. Their digital identities are optimized for maximum lead generation, rapid admissions processing, and seamless, highly secure internal communication.

Ahmedabad University: The Apex of Compartmentalization

Ahmedabad University operates as an elite, multi-disciplinary private institution. Its digital infrastructure, hosted exclusively on @ahduni.edu.in, is exceptionally clean, meticulously segmented, and highly intuitive, reflecting an international standard of university administration designed to interact seamlessly with global partners.⁵⁴

The university heavily compartmentalizes its functional workflows to ensure high efficiency. General queries are routed to info@ahduni.edu.in. Internal operations are strictly segregated: Human Resources utilizes careers@ahduni.edu.in, while the Career Development Centre operates via careerdevelopment@ahduni.edu.in.⁵⁴ Crucially, admission queries are split by academic level to prevent cross-contamination of prospective student pools; undergraduate admissions route specifically to ugadmissions@ahduni.edu.in.⁵⁴ Internal ERP and complex IT support functions are isolated at support@ahduni.edu.in.⁵⁴

Leadership communication utilizes strict RBAC schemas, such as dean.sph@ahduni.edu.in for the School of Public Health and artsandsciences@ahduni.edu.in for the broader School of Arts

and Sciences.⁵⁶ Faculty emails are rigidly standardized to a firstname.lastname format. For example, Professor Sanjay Chaudhary utilizes sanjay.chaudhary@ahduni.edu.in.⁵⁸ This rigid syntactical enforcement ensures a high degree of deliverability, prevents email spoofing, and maintains impeccable brand consistency across all external academic communications.

Dharmsinh Desai University (DDU), Nadiad: Faculty-Centric Routing

DDU serves as a critical Tier 2 pivot point in the state, functioning as a highly reputed, partially grant-in-aid and self-financed university known particularly for engineering and medical sciences.⁵ Its digital structure, anchored to @ddu.ac.in, leans heavily on RBAC to manage communication across its distinct and powerful faculties.⁵⁹

The central nervous system of the university relies on high-level administrative nodes like registrar@ddu.ac.in and examcontroller@ddu.ac.in.⁵⁹ However, DDU's unique feature is its use of functional prefixes to route emails directly to the administrative heads of its diverse faculties, bypassing a central switchboard. The Faculty of Technology is managed exclusively via dean.fot@ddu.ac.in. The Faculty of Pharmacy routes to deanpharmacy@ddu.ac.in. The Faculty of Management is accessed via deanmis@ddu.ac.in, and the Faculty of Dental Science uses deandental@ddu.ac.in.⁵⁹

The Dr. N. D. Desai Faculty of Medical Science and Research maintains a distinct, highly autonomous sub-hierarchy within the parent domain. The Dean, Dr. Arun H. Vyas, is reached directly at dean.medical@ddu.ac.in, while the Medical Superintendent, Dr. Pukur I. Thekdi, operates via ms.medical@ddu.ac.in.⁶⁰ DDU's architecture reveals a deeply compartmentalized institution where cross-faculty communication relies heavily on vertical escalation to the dean level rather than lateral, ad-hoc departmental networking.

Parul University, Vadodara: The Mass-Scale CRM Architecture

Over the last decade, Parul University has scaled to operate one of the most extensive student recruitment and academic networks in the state, accommodating a massive international and domestic student body across countless disciplines.⁶³ Its domain infrastructure, @paruluniversity.ac.in, is not merely an academic tool; it is a highly structured, defensively robust enterprise machine designed to prevent spam, process tens of thousands of leads, and ensure maximum deliverability.⁶⁴

Core admissions are aggressively funneled into admissions@paruluniversity.ac.in, while general inquiries route to info@paruluniversity.ac.in.⁶³ Demonstrating its massive geographical reach, regional admission hubs (such as their Goa outreach center) utilize localized sub-domains like admissions@goa.paruluniversity.ac.in.⁶³

The most striking feature of Parul University's digital identity is its corporate faculty and staff syntax. While it nominally enforces a strict firstname.lastname@paruluniversity.ac.in format, the

sheer scale of its employee base necessitates a corporate solution to name collisions.⁶⁴ The institution appends numerical identifiers to faculty and outreach staff. Marketing and outreach personnel utilize highly specific, database-driven formats:

diksha.gaware22708@paruluniversity.ac.in, jayesh.dubla32146@paruluniversity.ac.in, and sagar.palwe17801@paruluniversity.ac.in.⁶³ This numerical appendage is a hallmark of enterprise-level IT management, signaling that outreach to Parul requires precise database matching, as guessing an email address based on a name alone will inevitably result in a bounce.

Marwadi University, Rajkot: The Domain Duality Matrix

Marwadi University, another rapidly scaling giant, exhibits a highly complex, dual-domain architecture explicitly designed to separate its academic, student-facing operations from its backend corporate and educational trust functions.⁶⁷

The university actively leverages both @marwadiuniversity.ac.in and @marwadieducation.edu.in simultaneously, creating a strict functional split.⁶⁷ High-level administrative routing, general public info, and senior admissions directors utilize the primary .ac.in domain. For example, general inquiries go to info@marwadiuniversity.ac.in, and the National Admission Director uses damodaran@marwadiuniversity.ac.in.⁶⁷

However, internal human resources, student helpdesks, and regional outreach officers operate behind the scenes utilizing the .edu.in domain. HR operates via hr@marwadieducation.edu.in. The crucial student helpdesk is accessed via student.helpdesk@marwadieducation.edu.in. Outreach officers utilize this domain heavily, with Prof. Hardik Doshi utilizing hardik.doshi@marwadieducation.edu.in and regional representatives using addresses like saheli.dey@marwadieducation.edu.in.⁶⁷ This duality suggests a sophisticated corporate structure where the "University" serves as the front-facing academic brand, while the "Education Trust" handles the logistical, personnel, and CRM mechanics on the backend. Institutional senders must map these domains carefully to avoid directing academic proposals to HR infrastructure.

Ganpat University and RK University: The Precision of the Inquiry Funnel

Both Ganpat University (in Mehsana) and RK University (in Rajkot) operate highly stable, centralized digital frameworks anchored to their primary domains, prioritizing what can best be described as the "inquiry funnel."

Ganpat University (@ganpatuniversity.ac.in) utilizes standardized naming conventions and dedicated operational routing.⁷¹ General contact operates via info@ganpatuniversity.ac.in, while specific services are compartmentalized into distinct nodes: the Controller of Examination resides at coe@ganpatuniversity.ac.in, and student support at

student.support@ganpatuniversity.ac.in.⁷² Recognizing the economic value of international students, the university operates a dedicated, high-priority funnel at int.admission@ganpatuniversity.ac.in.⁷³ Faculty email addresses strictly and predictably adhere to the firstname.lastname@ganpatuniversity.ac.in schema across all departments.⁷¹

Department	Faculty Member	Official Institutional Email Identity
Management Studies	Dr. Jayesh Patel	jayesh.patel@ganpatuniversity.ac.in ⁷¹
Computer Applications	Dr. Meghna Patel	meghna.patel@ganpatuniversity.ac.in ⁷¹
Engineering & Tech	Dr. Devang Pandya	devang.pandya@ganpatuniversity.ac.in ⁷¹
Pharmacy (Principal)	Dr. Sanjeev R. Acharya	principal.ioph@ganpatuniversity.ac.in ⁷¹
Social Sciences	Dr. Usha Kaushik	usha.kaushik@ganpatuniversity.ac.in ⁷¹
Science	Dr. Keyur Bhatt	kdb01@ganpatuniversity.ac.in ⁷¹

RK University (@rku.ac.in) and nearby Darshan University (@darshan.ac.in) similarly prioritize short, functional aliases for core administration.⁷⁵ RKU utilizes inquiry@rku.ac.in, vc@rku.ac.in, registrar@rku.ac.in, tpo@rku.ac.in, and pr@rku.ac.in to route traffic instantly to decision-makers, bypassing bloated central inboxes.⁷⁵ The defining characteristic of these scaling private universities is their digital architecture's orientation toward lead capture, rapid grievance management, and seamless B2B routing, contrasting sharply with the academic departmental autonomy seen in legacy colleges.

Legacy State Universities: Bureaucratic Sprawl and Digital Vulnerabilities

State-level affiliating universities, specifically the massive entities of Gujarat University (GU) and Sardar Patel University (SPU), present the most complex, sprawling, and fundamentally inconsistent digital identities within the state's educational matrix.⁹ As umbrella organizations responsible for governing hundreds of geographically dispersed affiliated colleges, their central

IT infrastructures frequently struggle to impose strict digital compliance across all constituent departments, autonomous colleges, and tenured faculty members.

Gujarat University, Ahmedabad: Navigating Massive Scale

As the state's largest, oldest, and most politically significant affiliating university, Gujarat University oversees an unimaginable volume of student traffic, online examinations, and complex administrative governance.⁸⁰ Its primary domain is anchored at @gujaratuniversity.ac.in.

To manage this immense scale, the university cannot rely on a single, monolithic server infrastructure. Instead, the core administrative nodes rely on definitive RBAC aliases, with the critical office of the Registrar contacted via registrar@gujaratuniversity.ac.in.⁸¹ For daily operations involving the massive student body, the university heavily leverages entirely separate platforms for ERP and online education, driving traffic to sub-domains like online.gujaratuniversity.ac.in or utilizing external governmental vendor platforms such as samarth.edu.in to handle load balancing during admission and examination seasons.⁸⁰

Sardar Patel University (SPU): The Crisis of Digital Fragmentation

SPU, located in Vallabh Vidyanagar, provides a critical and alarming case study in the digital fragmentation that severely plagues Tier 3 departments within legacy Tier 1/2 state universities.⁸⁴ SPU's official top-level domain is @spuvvn.edu, notably utilizing the highly coveted .edu extension rather than the standard .ac.in.⁸⁴

While central university officers reliably utilize the primary domain, data extracted from various academic departments reveals a widespread, systemic reliance on vulnerable commercial email servers (such as Yahoo and Gmail) by tenured faculty and departmental heads. The central officers maintain compliance: the Registrar utilizes registrar_spu@spuvvn.edu, and social media operations route through socialmedia@spuvvn.edu.⁸⁷ However, the Vice Chancellor's office highlights the beginning of the fracture, maintaining an official alias (vc_spu@spuvvn.edu) but simultaneously listing a commercial alias (vcspu@yahoo.co.in) in official directories.⁸⁵

A deep dive into the Department of Computer Science—ironically the department that should champion digital infrastructure—reveals shocking inconsistencies. While some faculty, like Dr. S. A. Jain (sonaljain@spuvvn.edu) and Dr. B. B. Patel (bb_patel@spuvvn.edu), utilize the official domain, senior professors heavily, and almost exclusively, rely on commercial domains.⁸⁴

Faculty Member / Office	Role / Department	Official Listed Contact Identity	Security/Compliance Implication
-------------------------	-------------------	----------------------------------	---------------------------------

Dr. P. P. Pittalia	Professor, Computer Science	prashantppittalia@yahoo.com ⁸⁴	Commercial Domain Reliance
Dr. V. L. Desai	Professor, Computer Science	vinoddesai123@gmail.com ⁸⁴	Commercial Domain Reliance
Dr. P. V. Virparia	Professor, Computer Science	pvvirparia@yahoo.com ⁸⁴	Commercial Domain Reliance
Dr. D. B. Choksi	Professor, Computer Science	dbchoksi@yahoo.com ⁸⁴	Commercial Domain Reliance
Ms. Lakshitha S L	Asst. Professor (Ad-hoc)	lakshithasl63@gmail.com ⁸⁴	Commercial Domain Reliance
Agro-Economic Research	Director's Office	director.aerc@gmail.com ⁸⁵	Unsecured Institutional Node
B.N. Patel Institute	Affiliated College Admin	nspatel99@gmail.com ⁸⁶	Unsecured Institutional Node
C. P. Patel Commerce	Affiliated College Admin	drrdmodi@gmail.com ⁸⁶	Unsecured Institutional Node

The evidence demonstrates that IT policy enforcement is virtually non-existent at the departmental and affiliated college level within SPU. For external institutions, government grant bodies, or corporate senders attempting to engage with SPU faculty, relying solely on corporate data-scraping algorithms that assume a standardized @spuvvn.edu syntax will inevitably result in massive email bounce rates. Real-world, high-level academic communication in these legacy environments is currently flowing heavily through unsecured, personal Yahoo, Gmail, and Rediffmail servers.

State Departmental Architecture: The Overarching @gujarat.gov.in Framework

To fully contextualize and map the academic infrastructure of Gujarat, one must also account for the apex state-level bodies that govern, fund, regulate, and direct these universities.⁴¹ Organizations such as the Gujarat Institute of Disaster Management (GIDM) and the Society for Creation of Opportunity through Proficiency in English (SCOPE) showcase the

uncompromising rigidity of the state's central IT network.

The State Government mandates the @gujarat.gov.in TLD for all official government bodies and high-level educational directorates.⁸⁹ Within this framework, agencies employ heavily abbreviated, strictly role-based prefix systems designed for permanent bureaucratic continuity.

At GIDM, the Director General utilizes dg-gidm@gujarat.gov.in. Subordinate Program Managers are locked into functional acronyms like apspm-gidm@gujarat.gov.in and appm1-gidm@gujarat.gov.in. Administrative staff utilize mfa-gidm@gujarat.gov.in (Manager Finance) and sm-gidm@gujarat.gov.in (System Manager).⁸⁹ At the highest levels of educational oversight, the Commissioner of Higher Education utilizes commi-highedu@gujarat.gov.in.⁹⁰

Even autonomous state entities like Dr. Babasaheb Ambedkar Open University (BAOU), which maintains its own academic TLD (@baou.edu.in) for student interactions, must interface with this state network. BAOU utilizes strict functional aliases like vc@baou.edu.in and registrar@baou.edu.in, but interactions with the Chancellor—who is by law the Governor of Gujarat—must revert entirely to the secured state domain: rajbhavangujarat@gujarat.gov.in.⁹¹

This state-level data highlights the absolute apex of the communication routing hierarchy. In the Indian educational context, all major university policies, funding grants, infrastructural approvals, and regulatory frameworks cascade downward from these @gujarat.gov.in nodes, eventually filtering into the .ac.in, .edu.in, and .edu domains of the respective universities. A failure to map and respect this hierarchy ensures that institutional senders remain isolated from the actual centers of power and funding.

Strategic Implications and Systemic Vulnerabilities

The exhaustive extraction and mapping of these institutional sender identities yield several profound structural insights regarding the current state, trajectory, and vulnerabilities of digital administration in Gujarat's higher education sector.

First, the data confirms the absolute dominance of centralized matrix governance in Tier 1 and scaling private universities. Institutions like CHARUSAT, Parul, Marwadi, and Ahmedabad University have entirely abandoned decentralized communication. By enforcing strict naming conventions (admission_[college] or firstname.lastname[id]), these universities funnel all external communication through sophisticated CRM tools. This prevents individual departments from operating as impenetrable silos, ensures rapid, metric-driven response times to admission queries, and vigorously protects the institutional brand from spoofing.

Second, the CVMU ecosystem perfectly illustrates the persistent, deep-seated friction of post-merger IT integration. The coexistence of legacy domains like @gcet.ac.in alongside the modern @cvmu.edu.in domain signals ongoing political and operational compromises between central university branding and historic college identity. For external institutional senders,

navigating consortiums like CVMU strictly requires a dual-database approach, maintaining records for both the deeply respected legacy domains and the new parent domain.

Third, the dual-routing domains of the state engineering colleges reveal a split personality within public technical education. The reliance on both localized .ac.in domains (for internal academics) and the overarching @gujarat.gov.in domain (for bureaucratic compliance) dictates a highly specific outreach strategy. Academic collaboration must be routed through the former; funding, grievance, or policy initiatives must be routed through the latter.

Finally, the rampant, systemic use of Yahoo and Gmail accounts by senior professors, deans, and principals within the SPU network, BJVM, and various affiliated legacy colleges exposes a massive, critical infrastructure vulnerability. It indicates a severe lack of cloud infrastructure funding, an absence of mandatory IT policy enforcement, and an existential risk to institutional memory. When a tenured professor utilizing a Yahoo email retires or departs, decades of vital academic correspondence, high-level research contacts, and institutional networks vanish instantly. From an outreach perspective, this data confirms that automated mass-mailing CRM systems will continuously struggle to penetrate these legacy networks unless they intentionally account for these personal, commercial domains, bypassing standard algorithmic assumptions of .ac.in uniformity. Understanding these syntactical rules, recognizing the dominance of RBAC aliases, and navigating the specific domain TLDs is the fundamental prerequisite for executing successful, high-deliverability institutional operations across Gujarat's complex academic infrastructure.
